

Merve Arpacioğlu Türk

Software Developer

I am an enthusiastic junior developer with a strong focus on Backend Development using C# and .NET technologies. At the same time, I am actively improving my skills in Full Stack Development, including frontend technologies and database management. I am particularly passionate about working with data and building scalable, efficient applications across the stack. I am currently seeking opportunities to join a collaborative software development team where I can grow professionally and contribute to creating innovative solutions using .NET and modern full stack technologies.
